

JavaScript Beginner Practice Problems

If/else, loops, strings, arrays, functions, and basic logic

This PDF includes the original 16 problems, including Check Vowel or Consonant, plus additional beginner-friendly problems for more practice.

Contents

1. Check Positive or Negative
2. Even or Odd
3. Largest of Two Numbers
4. Print Numbers 1 to 10
5. Sum of Numbers
6. Multiplication Table
7. Reverse a String
8. Count Vowels
9. Factorial
10. Palindrome Check
11. Find Largest in Array
12. FizzBuzz
13. Simple Calculator
14. Print Even Numbers
15. Count Down
16. Check Vowel or Consonant
17. Check Leap Year
18. Prime Number Check
19. Find Smallest in Array
20. Sum of Array Elements
21. Average of Array Elements
22. Count Words in a Sentence
23. Find Longest Word
24. Remove Duplicates from Array
25. Temperature Converter

1. Check Positive or Negative

Problem

Write a function that checks whether a number is positive, negative, or zero.

Solution

```
function checkNumber(num) {  
  if (num > 0) {  
    return "Positive";  
  } else if (num < 0) {  
    return "Negative";  
  } else {  
    return "Zero";  
  }  
}  
  
console.log(checkNumber(-5));
```

2. Even or Odd

Problem

Check if a number is even or odd.

Solution

```
function evenOrOdd(num) {  
  if (num % 2 === 0) {  
    return "Even";  
  } else {  
    return "Odd";  
  }  
}  
  
console.log(evenOrOdd(7));
```

3. Largest of Two Numbers

Problem

Find the larger number between two values.

Solution

```
function findLargest(a, b) {  
  if (a > b) {  
    return a;  
  } else {  
    return b;  
  }  
}  
  
console.log(findLargest(10, 20));
```

4. Print Numbers 1 to 10

Problem

Use a loop to print numbers from 1 to 10.

Solution

```
for (let i = 1; i <= 10; i++) {  
  console.log(i);  
}
```

5. Sum of Numbers

Problem

Find the sum from 1 to n.

Solution

```
function sumNumbers(n) {  
  let sum = 0;  
  
  for (let i = 1; i <= n; i++) {  
    sum += i;  
  }  
  
  return sum;  
}  
  
console.log(sumNumbers(5));
```

6. Multiplication Table

Problem

Print the multiplication table of a number.

Solution

```
function multiplicationTable(num) {  
  for (let i = 1; i <= 10; i++) {  
    console.log(num + " x " + i + " = " + (num * i));  
  }  
}  
  
multiplicationTable(5);
```

7. Reverse a String

Problem

Reverse a string using a loop.

Solution

```
function reverseString(str) {  
  let reversed = "";  
  
  for (let i = str.length - 1; i >= 0; i--) {  
    reversed += str[i];  
  }  
  
  return reversed;  
}  
  
console.log(reverseString("hello"));
```

8. Count Vowels

Problem

Count vowels in a string.

Solution

```
function countVowels(str) {  
  let count = 0;  
  let vowels = "aeiou";  
  
  for (let i = 0; i < str.length; i++) {  
    if (vowels.includes(str[i].toLowerCase())) {  
      count++;  
    }  
  }  
  
  return count;  
}  
  
console.log(countVowels("JavaScript"));
```

9. Factorial

Problem

Find factorial of a number.

Solution

```
function factorial(num) {  
  let result = 1;  
  
  for (let i = 1; i <= num; i++) {  
    result *= i;  
  }  
  
  return result;  
}  
  
console.log(factorial(5));
```

10. Palindrome Check

Problem

Check if a word is a palindrome.

Solution

```
function isPalindrome(str) {  
  let reversed = "";  
  
  for (let i = str.length - 1; i >= 0; i--) {  
    reversed += str[i];  
  }  
  
  if (str === reversed) {  
    return true;  
  } else {  
    return false;  
  }  
}  
  
console.log(isPalindrome("madam"));
```

11. Find Largest in Array

Problem

Find the biggest number in an array.

Solution

```
function largestNumber(arr) {  
  let largest = arr[0];  
  
  for (let i = 1; i < arr.length; i++) {  
    if (arr[i] > largest) {  
      largest = arr[i];  
    }  
  }  
  
  return largest;  
}  
  
console.log(largestNumber([3, 7, 2, 9, 1]));
```

12. FizzBuzz

Problem

Print "Fizz" for multiples of 3, "Buzz" for multiples of 5, and "FizzBuzz" for both.

Solution

```
for (let i = 1; i <= 20; i++) {  
  if (i % 3 === 0 && i % 5 === 0) {  
    console.log("FizzBuzz");  
  } else if (i % 3 === 0) {  
    console.log("Fizz");  
  } else if (i % 5 === 0) {  
    console.log("Buzz");  
  } else {  
    console.log(i);  
  }  
}
```

13. Simple Calculator

Problem

Make a calculator using functions and if/else.

Solution

```
function calculator(a, b, operator) {  
  if (operator === "+") {  
    return a + b;  
  } else if (operator === "-") {  
    return a - b;  
  } else if (operator === "*") {  
    return a * b;  
  } else if (operator === "/") {  
    return a / b;  
  } else {  
    return "Invalid Operator";  
  }  
}  
  
console.log(calculator(10, 5, "*"));
```

14. Print Even Numbers

Problem

Print all even numbers from 1 to 20.

Solution

```
for (let i = 1; i <= 20; i++) {  
  if (i % 2 === 0) {  
    console.log(i);  
  }  
}
```

15. Count Down

Problem

Print numbers from 10 to 1.

Solution

```
for (let i = 10; i >= 1; i--) {  
  console.log(i);  
}
```

16. Check Vowel or Consonant

Problem

Write a function that checks whether a character is a vowel or consonant.

Solution

```
function checkLetter(letter) {  
  letter = letter.toLowerCase();  
  
  if (  
    letter === "a" ||  
    letter === "e" ||  
    letter === "i" ||  
    letter === "o" ||  
    letter === "u"  
  ) {  
    return "Vowel";  
  } else {  
    return "Consonant";  
  }  
}  
  
console.log(checkLetter("A"));  
console.log(checkLetter("z"));
```

Shorter Version Using includes()

```
function checkLetter(letter) {  
  let vowels = "aeiou";  
  
  if (vowels.includes(letter.toLowerCase())) {  
    return "Vowel";  
  } else {  
    return "Consonant";  
  }  
}  
  
console.log(checkLetter("e"));
```

More Practice Problems

The following problems were added for extra practice.

17. Check Leap Year

Problem

Write a function that checks whether a year is a leap year.

Solution

```
function isLeapYear(year) {  
  if ((year % 4 === 0 && year % 100 !== 0) || year % 400 === 0) {  
    return "Leap Year";  
  } else {  
    return "Not a Leap Year";  
  }  
}  
  
console.log(isLeapYear(2024));
```

18. Prime Number Check

Problem

Check whether a number is prime or not.

Solution

```
function isPrime(num) {  
  if (num <= 1) {  
    return false;  
  }  
  
  for (let i = 2; i < num; i++) {  
    if (num % i === 0) {  
      return false;  
    }  
  }  
  
  return true;  
}  
  
console.log(isPrime(7));
```

19. Find Smallest in Array

Problem

Find the smallest number in an array.

Solution

```
function smallestNumber(arr) {  
  let smallest = arr[0];  
  
  for (let i = 1; i < arr.length; i++) {  
    if (arr[i] < smallest) {  
      smallest = arr[i];  
    }  
  }  
  
  return smallest;  
}  
  
console.log(smallestNumber([8, 3, 12, 1, 6]));
```

20. Sum of Array Elements

Problem

Find the total sum of all numbers in an array.

Solution

```
function sumArray(arr) {  
  let sum = 0;  
  
  for (let i = 0; i < arr.length; i++) {  
    sum += arr[i];  
  }  
  
  return sum;  
}  
  
console.log(sumArray([1, 2, 3, 4, 5]));
```

21. Average of Array Elements

Problem

Find the average value of numbers in an array.

Solution

```
function averageArray(arr) {  
  let sum = 0;  
  
  for (let i = 0; i < arr.length; i++) {  
    sum += arr[i];  
  }  
  
  return sum / arr.length;  
}  
  
console.log(averageArray([10, 20, 30, 40]));
```

22. Count Words in a Sentence

Problem

Count how many words are in a sentence.

Solution

```
function countWords(sentence) {  
  let words = sentence.trim().split(" ");  
  return words.length;  
}  
  
console.log(countWords("I love JavaScript"));
```

23. Find Longest Word

Problem

Find the longest word in a sentence.

Solution

```
function longestWord(sentence) {  
  let words = sentence.split(" ");  
  let longest = words[0];  
  
  for (let i = 1; i < words.length; i++) {  
    if (words[i].length > longest.length) {  
      longest = words[i];  
    }  
  }  
  
  return longest;  
}  
  
console.log(longestWord("I am learning JavaScript"));
```

24. Remove Duplicates from Array

Problem

Remove repeated values from an array.

Solution

```
function removeDuplicates(arr) {  
  let result = [];  
  
  for (let i = 0; i < arr.length; i++) {  
    if (!result.includes(arr[i])) {  
      result.push(arr[i]);  
    }  
  }  
  
  return result;  
}  
  
console.log(removeDuplicates([1, 2, 2, 3, 4, 4, 5]));
```

25. Temperature Converter

Problem

Convert Celsius temperature to Fahrenheit.

Solution

```
function celsiusToFahrenheit(celsius) {  
  let fahrenheit = (celsius * 9) / 5 + 32;  
  return fahrenheit;  
}  
  
console.log(celsiusToFahrenheit(30));
```
